

The Ca' Rugate wine museum collects over 150 pieces between tools and equipment of the vine-grower's work that the Tessari family inherited from their agricultural activity in about 100 years of history.

It is a museum collection of tools and equipment and their setting in the context of rural everyday life. The exhibition, in fact, documents the development of the productive process of wine, from the arrival of the grapes to the farmyard of a 1940's house to the bottling of the wine in the cellar.

Recreating a house and its courtyard, on the exterior we find the tools which by habit were left in the farmyard: the cart, wicker baskets, a press, the destemmers ... The interior of the house displays a hall way and a kitchen where daily objects and their uses emerge.

You can observe tools that measure alcohol, a tool used to cork bottles by hand and a glass container to measure quantity.

Polveratrice

Tappatrice da tavola

In the room dedicated to the warehouse, the visitor will find the monumental press made up of many parts and unique pieces for making wine: piston pumps to weigh, copper filters, gassificatore.

In the caneva, the system of drying out the grape according to the tradition can be viewed.

A cellar closes the exhibit where the enormous barrels rich of inlay and small tools for weighing, bestow the room almost in a sacred way.

Legatrice a filo animato

# The memory is the treasure and custodian of all things.

Cicerone

As the cart of the Great Bear, this museum of wine is a step behind in time that is able to lead us towards tomorrow. A journey open to all, from a single visitor, to families, from schools to groups of people fascinated by history and wine culture.
